# **Miniature Regulator**

# ARJ210 Series

- Lightweight body made of aluminum (60 a)
- Two types of piping connections provided for the IN side: 1/8 (male thread) and M5 (female thread)

ARJ210-M5BG

#### Symbol

#### Standard Specifications

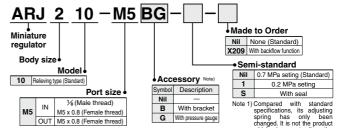

Model		ARJ210-M5	
Port size	IN side	1/8 (Male thread), M5 x 0.8 (Female thread)	
	OUT side	M5 x 0.8 (Female thread 2 pcs.)	
Fluid		Air	
Proof pressure		1.2 MPa	
Maximum operating pressure		0.8 MPa	
Regulating pressure range		Standard: 0.2 to 0.7 MPa	
		0.2 MPa setting 0.05 to 0.2 MPa	
Pressure gauge port size		M5 x 0.8 (Female thread)	
Ambient and fluid temperature		-5 to 60°C (No freezing)	
Construction		Relieving type	
Weight (kg)		0.06	

#### Accessory (Option)/Part No.

Bracket	134856
Pressure gauge Note)	G27-10-R1

Note) When ordering the pressure gauge, a socket assembly (134828A) is required. When installing a pressure gauge, the socket assembly must be fixed and installed to prevent the thread from breaking. 0.2 MPa specification is not available for G27.

## **How to Order**

OUT M5 x 0.8 (Female thread) Note) Backflow function is not available for standard.

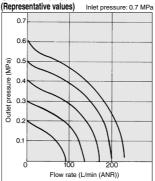

X209 is with backflow function.

A main valve opens when the inlet pressure is released, and then an outlet pressure backflows into the inlet side.

X209 is a product with pressure gauge (G27-10-M-X202). The symbol

"G" for accessory is not necessary.

#### Flow Rate Characteristics

Pressure Conditions (Initial setting) Inlet pressure: 0.7 MPa Characteristics Outlet pressure: 0.2 MPa (Representative values) Flow rate: 20 L/min (ANR) Outlet pressure (MPa) Initial set point 0.15 0.3 0.4 0.5 0.6 0.7 0.8 0.9 Inlet pressure (MPa)

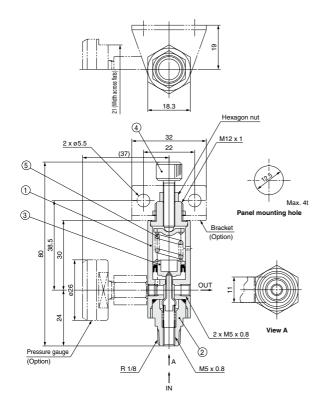

which does not allow the

pressure more than 0.2 MPa.

Adjusting spring is not re-placeable.

#### Construction/Dimensions

No.	Description	Material	Note		
1	Body	Aluminum alloy	Black anodized		
2 Valve guide 3 Piston		Brass	Electroless nickel plated		
		POM			
4	Adjusting screw	Iron	Nickel plated		
5	Adjusting spring	Steel wire	Zinc chromated		

# **⚠** Precautions

Be sure to read this before handling the products.

Refer to page 9 for safety instructions and pages

13 to 17 for precautions on every series.

#### Selection

#### **∆Warning**

- This product cannot be used as a check regulator by installing it between solenoid valve and actuator. Doing so could lead to equipment damage.
- 2. When piping, tighten the regulator with the recommended proper tightening torque shown in the table below while holding the wrench flats (width 11) of the valve guide for IN port and holding the hexagonal section of the body for the OUT port. Excessive torque or holding it other than at the specified area could lead to equipment damage.
- While piping to products or operating the knob, ensure that an excessbending moment should not be applied to a product, because it may result in damage.

#### Recommended proper torque

Connection thread	Recommended proper torque [N·m]	Note	
M5	1.0 to 1.5	The recommended torque when using a tightening tool to tighten an additional 1/6 to 1/4 turn after tightening by hand	
R1/8	7 to 9	_	

#### **∆Caution**

 When operating at an inlet pressure lower than the inlet pressure used in the flow rate characteristics graph, the pressure drop on the outlet side may be greater. Therefore, be sure to conduct testing using the actual equipment.
 For pressure control equipment selection,

refer to the "Product Selection Guide."

# Mounting/Adjustment

#### **∆Warning**

Set up the regulator while verifying the pressure that is indicated on the inlet and the outlet pressure gauges. Turning the knob excessively could damage the internal parts.

#### **∆Caution**

Release the lock to adjust the pressure.
 After the adjustment, engage the lock.
 Failure to observe this procedure could damage the knob or cause the outlet pressure to fluctuate.

<Lock operating method>

Loosen the lock nut to unlock it, and tighten it to lock it.

- This product cannot be used as a check regulator by installing it between solenoid valve and actuator. (Except X209)
- Port with a pressure gauge or a plug can be used as an OUT port.

#### Maintenance

## **∆Warning**

Make sure to perform a periodic inspection
of the pressure gauge when the miniature
regulator is installed between a solenoid
valve and an actuator. Sudden pressure
changes could happen and the durability
of the product could be reduced. Using an
electronic type pressure gauge is recommended, depending on the situation.
